Periods of record: San Diego temperature: 1872, precipitation: 1850. Santa Ana temperature: 1916, precipitation: 1906. Riverside: 1924. Escondido: 1900. Big Bear Lake: 1960. Idyllwild: 1943. Palomar Mountain: 1938. Victorville: 1917. Palm Springs temperature: 1917, precipitation: 1906. Borrego Springs temperature: 1965, precipitation: 1942.

### On this day in...

**2006:** A major heat wave with humidity, in some ways unprecedented, hit Southern California. It was 121° in Palm Springs, 120° at Indio and Thermal, 114° at Ontario and the Wild Animal Park, and 113° at El Cajon. It was 112° at Escondido and 109° in La Mesa; both were highest temperatures on record. The 112° reading in Escondido beat the old record of 111° on 9.6.1955. Record high minimum temperatures were recorded in most places. Desert locations reported the all-time warmest month on record and a few locations west of the mountains (such as San Diego) did not drop below 70° all month. Sea surface temperatures hit 80°. Many were killed from the heat, and many more were treated for heat related illnesses. Some power outages occurred. Strong thunderstorm winds hit Lake Elsinore and blew down a 40 foot tree.

**1966:** A tornado touched down in Victorville.

**1902:** A dying tropical cyclone brought two inches of rain to the mountains and deserts of Southern California during a very strong El Niño event of 1901-02.
